

PRASHANT KUMAR

Bengaluru, India | +91 91557 29247 | prashantsin2gh@gmail.com

PROFESSIONAL SUMMARY

Full Stack Software Engineer with 2+ years of experience building and scaling customer-facing production web applications using React.js, TypeScript, Next.js, Node.js, and PostgreSQL. Skilled in REST and GraphQL API design, JWT authentication, Docker containerization, and CI/CD pipelines. Experienced in building customer-facing applications, scalable frontend architectures, backend services, and production-ready software solutions in Agile environments. Proficient with AI-assisted development tools including Cursor, Claude Code, GitHub Copilot, ChatGPT, and Gemini to accelerate development velocity and code quality.

TECHNICAL SKILLS

Frontend: React.js, Next.js, TypeScript, JavaScript, Redux Toolkit, Tailwind CSS, HTML5, CSS3

Backend: Node.js, Express.js, REST APIs, GraphQL, JWT Authentication, Microservices

Database & Caching: PostgreSQL, SQL, Firebase, Redis

Cloud & DevOps: Docker, AWS, CI/CD, GitHub Actions, Git, Monitoring & Logging

Testing: Jest, React Testing Library, Unit Testing, Integration Testing

Principles: Object-Oriented Programming (OOP), API Design, Performance Optimization, Design Patterns

AI-Assisted Dev: Cursor, Claude Code, GitHub Copilot, ChatGPT, Gemini

PROFESSIONAL EXPERIENCE

Indic Arena Technology Pvt. Ltd.

Noida, India

Software Engineer

July 2023 – Present

- Built 10+ production React.js and Next.js applications with TypeScript, Redux Toolkit, and modular component architecture — improving development velocity by 40% and reducing bug reports by 30%.
- Engineered scalable Node.js and Express.js backend services with PostgreSQL schema design and query optimization; implemented role-based access control (RBAC) and JWT-based authentication across multi-role customer-facing applications.
- Integrated 20+ REST and GraphQL APIs with structured error handling and optimized data-fetching strategies; consumed GraphQL endpoints for efficient real-time data synchronization between frontend and backend services.
- Containerized applications using Docker and configured CI/CD pipelines with GitHub Actions for automated testing, staging, and production deployments, replacing manual release workflows with fully automated delivery.
- Optimized frontend performance by 35% through code splitting, lazy loading, memoization, and efficient state management; maintained application observability using monitoring and logging tools.
- Collaborated with Product and Design in Agile (Scrum) ceremonies to deliver user-facing features; actively participated in code reviews, pull requests, and stand-ups; leveraged Cursor, Claude Code, and GitHub Copilot to ship higher-quality code faster.
- Developed and maintained unit and integration tests using Jest and React Testing Library, improving application reliability and reducing production defects; contributed to microservices architecture projects with exposure to distributed systems and async processing.

PROJECTS

Namasvi Nexus | React.js · Node.js · PostgreSQL · JWT · REST APIs

- Developed a full-stack customer-facing platform using React.js, Node.js, and PostgreSQL with secure JWT-based authentication and role-based access control.
- Designed reusable React component architecture and integrated REST APIs to support scalable workflows, improving maintainability and development efficiency.
- Optimized PostgreSQL schema design and query performance while implementing secure backend services for production-ready application delivery.

Elympiad Quiz Platform | React.js · Node.js · GraphQL · JWT

- Built a scalable quiz administration platform with GraphQL API integration, secure authentication, and real-time leaderboard workflows.
- Developed dashboard modules, reporting systems, and data-driven interfaces for managing participants, contests, and results.
- Improved application performance through optimized data fetching, state management, and concurrent user handling strategies.

Cloud Deployment Platform | *React.js · Node.js · Docker · Redis · AWS*

- Developed a deployment automation platform supporting Docker container management, deployment lifecycle tracking, and cloud infrastructure orchestration.
- Implemented Redis-based asynchronous queue processing and backend workflows for deployment execution and status monitoring.
- Integrated AWS services, monitoring, logging, and CI/CD practices to improve deployment reliability and operational visibility.

EDUCATION

Master of Computer Applications (MCA) Lakshmi Narain College of Technology	<i>2021 – 2023</i>
Bachelor of Science – Mathematics BRABU University	<i>2016 – 2019</i>
