Professional Summary

Full Stack Developer with 2.5 years of professional experience delivering scalable web applications, admin dashboards, CMS platforms, and real-time systems using React.js and Node.js. Strong background in frontend architecture, backend integration, performance optimization, and Agile delivery.

Professional Experience

Full Stack Developer – Indiclancers Technology (July 2023 – Nov 2025)

- Delivered and maintained 6+ production-grade web applications including admin dashboards, CMS platforms, and real-time systems.
- Architected scalable frontend solutions using React.js, Redux Toolkit, and Context API, improving UI responsiveness by ~35%.
- Built and integrated Node.js backend services and RESTful APIs supporting authentication, authorization, and real-time data updates.
- Led end-to-end development of a real-time quiz platform with concurrent users, timers, scoring logic, and admin controls.
- Optimized state management, component rendering, and API interactions to reduce unnecessary re-renders and improve page load speed.
- Implemented role-based access control and secure data handling practices across admin and user-facing applications.
- Collaborated with designers, backend engineers, and stakeholders in Agile sprints to deliver features within committed timelines.

Key Achievements

- Recognized for consistently delivering features ahead of sprint deadlines while maintaining code quality.
 - Reduced manual content management effort by approximately 40% through improved CMS and admin tooling.
 - Improved application load time and runtime performance across multiple projects through targeted optimizations.
 - Played a key role in stabilizing production releases by proactively identifying and fixing performance bottlenecks.
-

Key Projects

Real-Time Quiz Platform – Admin & user panels with real-time updates and role-based access. Website: <https://elympiad.com>

Admin Dashboard & CMS – Modular dashboards and content management systems for client operations. Website: <https://devshilpeearchitects.com>

Business Websites & Web Applications – Responsive, SEO-friendly, performance-optimized business websites. Website: <https://wildflowers.earth>

Technical Skills

Frontend: React.js, JavaScript, HTML5, CSS3, Tailwind CSS

State Management: Redux Toolkit, Context API

Backend: Node.js, RESTful APIs

Databases: Firebase, Firestore, PostgreSQL

Tools: Git, GitHub, Vercel, Netlify

Education

Master of Computer Applications (MCA), 2021–2023 | Bachelor of Science in Mathematics, 2016–2019
